

## GLIMPSES OF THE ACTIVITIES CONDUCTED IN THE MONTH OF SEPTEMBER

Counting Activity- A counting activity was done for Pre-Nursery students in the class. In this activity, students counted the different objects and then picked the same number. They learned object counting and number recognition with the help of this activity.

Envelope Making Activity- Origami is fascinating; one piece of A4 paper can be turned into so many things. Pre-Nursery students made an envelope by folding the paper. Children loved the magic of turning a piece of paper into something useful and happily posted the envelope in the letterbox.

*Leaf Printing Activity* - It was a fun art activity where children used paint to print natural objects. They did this activity for color recognition and counting as well. The children enjoyed it a lot.

*Big and Small Activity* - The revision of the pre-number concept: big/small was done by nursery students through a sorting activity, where they sorted big balls and small balls. They not only learned the big/small concept but also learned to hold the things in their hands and transfer them carefully to the basket.

*Teddy Bear Making Activity-* Nursery students learned about circle shapes in a fun way. They made teddy bears with the help of circles of different sizes. Students also reinforced this shape by making a circle with their hands.

*Scooping Activity-* Scooping activities are a great way to develop fine motor skills and hand-eye coordination in children. Keeping this in mind this activity was conducted in Nursery class. Children transferred small objects from one bowl to another and enjoyed this fun activity.

*Thick and thin activity with clay* - Nursery Children enjoyed making colorful bangles with the help of clay in this activity and also learned the difference between thick and thin. It helped in sensory development, hand-eye coordination, and motor skills as well.

*Word Formation Activity*- On 2nd September Word Formation Activity was held in class Prep. For this activity students were given a set of letters and asked to create words. Children formed different words by picking up the letters and placing that word in the pocket. This activity helped in building the vocabulary of the students.

**Spray Painting Activity**- Spray Printing Activity was conducted for the students of Prep. Under the guidance of their teacher, students made a beautiful scene with the help of flower stencils, paints, and brushes. Learning to control paintbrushes and other painting tools is a great way to gain eye-hand coordination. It was an enjoyable activity that spread a smile on the faces of the children.

**Charkha Making Activity**- On the occasion of Gandhi Jayanti, students of Prep class were engaged in “Charkha Making Activity” to sensitize them to the significance and importance of celebrating this day. In this activity, students worked together to create charkha using cotton thread and paper. They even learned that Khadi is a hand-spun and hand-woven cloth.
