

REPORT OF THE ACTIVITIES CONDUCTED IN THE MONTH OF MAY

BUD PRINTING ACTIVITY- The Earbud Printing activity was conducted for the students of Pre Nursery. Children used earbuds and watercolors and put colorful dots on the picture of fish. This activity helped in the development of fine motor skills and eye-hand coordination.

TEARING AND PASTING ACTIVITY- A Tearing & Pasting activity was conducted for the students of Pre-Nursery and Nursery. It was a structured activity in which children tore the yellow paper and pasted it inside the mango. This activity makes the children assume a tripod grip for fingers that aids the grasp for writing and colouring.

NATURE WALK- Summer is such a colorful time of year! All the plants are in bloom and the beautiful weather makes it the perfect time to go exploring outdoors. It's also a great time to work on the colors and observation skills of the students. While doing nature walks our Pre-Nursery students keenly observed different types of green color plants, leaves, and grasses. They touched them too.

FLOAT & SINK ACTIVITY- Nursery students were engaged in the Sink and Float activity to reiterate the pre-number concept of heavy and light. It encouraged them to make observations and understand that light objects float and heavy objects sink.

LETTER 't' ACTIVITY- A fun *activity* 'HIT ME' was conducted in Nursery class wherein the children were supposed to identify the pictures starting with the letter, say the sound, and hit the picture. They had fun while searching objects related to the letter, matching letters in uppercase with lowercase, and hitting the correct picture. This activity helped in letter recognition and also increased the vocabulary & speaking skills of the students.

VIBGYOR ACTIVITY (for number 7)-Number recognition is about the physical appearance and shape of a number, as well as what value it represents. Nursery children did this activity by pasting different rainbow color circles in number seven. This activity helped in improving hand-eye coordination and fine motor skills too.

FEW AND MANY ACTIVITY- To understand the concept of few and many students of class Prep did an activity in which they put a handful of beans in one bowl and some beans in the other bowl. Then they counted the beans in both bowls and were able to differentiate between the few and many. The children enjoyed the activity.

DRAWING ACTIVITY- To help children think creatively and express their feelings, a drawing activity was conducted for the students of class Prep. Children drew various objects used in the summer season, summer fruits & vegetables, etc. Students participated with full zeal and displayed their immense talent with confidence.
